

freshwater senior campus

Freshwater Senior Campus offers students an opportunity to study in a focused, flexible and purpose designed young adult learning environment.

Our aim is to be a school of excellence, allowing students the freedom to learn through choice so that they achieve their personal best.

Curriculum and Learning

Students are at all times engaged in learning activities designed to be relevant, challenging, stimulating and achievable. The Campus instills a work ethic and a set of values which will give students the edge for their future studies and careers.

In an uncomplicated learning environment, the focus of the campus is on taking advantage of the unique opportunities provided by a senior learning culture.

The Campus provides students with the widest possible curriculum choices including a comprehensive range of academically challenging HSC subjects and an extensive range of TAFE courses. Students can select from over 80 courses. On-site TAFE facilities give students access to specialist courses in Web Design, Digital Arts, Tourism, Sport and Recreation and Child Studies.

Mentoring Program

All students participate in a weekly timetabled Mentoring Program which supports our young adults both academically and socially. Encouraging, motivating and teaching planning and organisational skills to students to ensure they achieve personal bests are key essentials of the Year 11/12 Mentoring Program.

Physical Environment – glass, space, light

Freshwater Senior Campus offers students the opportunity to study for their HSC in an inspirational and spectacular physical environment. The learning environment at the Campus is characterised by natural light, generous and interconnected learning spaces and tranquil, leafy surrounds.

The specialist facilities at the Campus are second to none and include: a national standard gymnasium, 100 seat lecture theatre, multi-media centre, integrated studies unit, design and creative arts facilities and modern science and hospitality facilities. The professional performance theatre, with raked audience seating for 250, gives students the opportunity to develop skills in both front and back of house production. These outstanding facilities enhance the learning opportunities for students attending the Campus.

Technology – state-of-the-art

The Information and Communication Technology resources are state-of-the-art and are linked to the sophisticated technology of TAFE NSW. The multi-media room, specialist computer rooms, library and administrative centre are all resourced with the latest hardware, including flat screen monitors, software and internet access. Students can access technology in any area of the Campus. Two computers for every five students is one of the lowest ratios provided by any school in New South Wales.

Co-Curricular Programs

Freshwater Senior Campus offers an exciting range of co-curricular programs, including The Duke of Edinburgh Award Scheme, Rock Eisteddfod and Dance Program, Drama and Music.

Our student leadership program allows students to take on a wide range of responsibilities that both develop individual leadership skills and support campus initiatives.

A three tiered sporting program is offered to students. Inter school grade sport and school sport will continue to be available. Targeted 'squads' in soccer, rugby league, netball and basketball supported and coached by high profile members of Northern Spirit Soccer, Manly Sea Eagles and Sydney Kings will develop our more talented and committed sports men and women. Students will also be able to compete in college teams which will include representatives from all five campuses of the Northern Beaches Secondary College.
